

# ASSEM MALGAZH DAROVA

[assem449@my.yorku.ca](mailto:assem449@my.yorku.ca) (437)-551-0773 | [linkedin.com/in/assemmalgazhdarova/](https://www.linkedin.com/in/assemmalgazhdarova/) | Toronto, ON | [github.com/assem449](https://github.com/assem449)

## EDUCATION

York University, Toronto, ON  
Honors Degree Bachelor of Science, Computer Science  
May 2026

## EXPERIENCE

### Game Developer Intern

May 2023-August 2023

#### STORYVERSE

The game is an interactive storytelling experience where players make choices that influence the narrative.

- Developed UI elements, focusing on creating engaging buttons, menus, and interactive components. Implemented reusable UI components from libraries to maintain a cohesive and standardized look and feel throughout the application.
- Utilized Payload, a content management system (CMS), to create a platform for creating stories. To represent story branching designed and developed functionality for creating, visualizing, and managing story paths through nodes and edges within the graph.
- Learned React Native and helped to develop iOS and Android apps that would use CMS inputs to create interactive game.

### Information technology Intern

May 2024-August 2024

#### METRO

- Assisted in troubleshooting technical issues, gaining exposure to problem-solving in an IT environment.
- Supported IT team with various tasks, contributing to day-to-day operations and technical support activities.

### Web Developer

August 2024-Present

#### Google Developer Student Club York University

- Managing and updating the club's website and GitHub page
- Creating dedicated web pages for conferences, career fairs, and solution challenges
- Ensuring the club's web presence is user-friendly and visually appealing

## PROJECTS

### Weather App [Personal Project]: *JavaScript, React, CSS*

[GitHub](#)

- Developed a Weather React App providing clothing recommendations based on current weather conditions for a user-specified city.
- Used an API key to fetch weather conditions for each city.
- Applied CSS for the frontend design of the website.

### Safe Walk AI [Hackathon Project]: *Python, React, JavaScript, Flask, CSS*

[GitHub](#)

- Collaborated in a group to develop a women's safety React app using JavaScript.
- Took the lead in organizing the GitHub repository.
- Developed the entire frontend of the app using CSS, including animations. Contributed to page transitions, and button functionality.

### Chat Bot [Personal Project]: *JavaScript, Node.js, Open AI API*

[GitHub](#)

- A chat bot application powered by the ChatGPT AI
- Tracks chat history to provide relevant responses

### E-commerce website [Personal Project]: *JavaScript, React, CSS*

[GitHub](#)

- Built a React-based app with Material-UI for pre-styled components.
- Enhanced user experience with seamless navigation and checkout using Material-UI buttons and icons.
